

Failures in Electrophysiology

the Redo Symposium

8-9.9.2017

Crvena Luka

Biograd na Moru

Croatia

The background of the slide features a faint ECG (heart rate) tracing overlaid on a sketch of a church tower with a pointed spire. The ECG leads are labeled on the left side: V3, V4, V5, V6, ABL1, ABL2, and RV1. The church tower is a detailed architectural drawing, showing multiple levels of windows and a prominent spire.

**Friday
September 8th**

- **17:00 Welcome address**
- **17:15 - 18:30 Session 1: Failures in atypical atrial flutter/tachycardias ablation**
 - **Chairmen: T. Tahin, D. Risteski**
 - **Case 1.** Ablation of atrial tachycardia in GUCH patient (P. Hlivak | Bratislava, Slovakia)
 - **Case 2.** Ablation of multiple atrial tachyarrhythmias – a neverending story (D. Marchov, V. Traykov | Sofia, Bulgaria)
 - **Case 3.** A challenging case of recurrent atrial tachycardia (G. Szeplaki | Dublin, Ireland)

**Friday
September 8th**

- **18:45 – 20:00 Session 2 : Failures in VT in structural heart disease ablation**
 - **Chairmen: L. Geller, N. Pavlović**
 - **Case 1.** Ablation of recurrent VT in ARVC patient (A. Pernat, M. Šinkovec, L. Klemen | Ljubljana, Slovenia)
 - **Case 2.** Epicardial approach using capnopericardium for VT ablation (M. Jan | Ljubljana, Slovenia)
 - **Case 3.** A couple of failures followed by success (R. Bernat, B. Schumacher | Kaiserslautern, Germany)
 - **Case 4.** Repeated ablations in ICDM patient (Z. Bakotić, A. Anić | Zadar, Croatia)
- **Dinner**

Saturday September 9th

- **09:00 – 10:15 Session 3 : Failures in AF ablation**

- **Chairmen: D. Vokač, D. Scherr**

- **Case 1.** Special problems with transeptal puncture during PVI (N. Szegeci, L. Geller | Budapest, Hungary)

- **Case 2.** Redo PVI case (G. Bencsik | Szeget, Hungary)

- **Case 3.** Redo PVI after cryoballoon ablation for atrial fibrillation (M. Tomović | Belgrade, Serbia)

- **Coffee break**

Saturday September 9th

- **10:45 – 12:00 Session 4 : Failures in PSVT ablation**

- **Chairmen: Š. Manola, V. Traykov**

- **Case 1.** Unusual way to reablate AV nodal reentry tachycardia (A. Riba, T. Tahin | Zalaegerszeg, Hungary)

- **Case 2.** Repeated ablation for WPW sy (Š. Manola, V. Radeljić, N. Pavlović, I. Zeljković | Zagreb, Croatia)

- **Case 3.** Redo SVT ablation (D. Scherr | Graz, Austria)

Saturday September 9th

- **12:00 – 13:00 Session 5 : Nightmare in EP lab**
 - **Chairmen: R. Bernat, P. Hlivak**
 - **Case 1.** Two cases of real nightmare (L. Geller | Budapest, Hungary)
 - **Case 2.** Acute Takotsubo syndrome at the time of transeptal puncture during LAA insertion procedure accompanied by cardiogenic shock, asystole and complete restitution of LV function in next weeks (D. Vokač, D.Suran, R. Bobinic | Maribor, Slovenia)
 - **Case 3.** Complete AV block during ablation for idiopathic PVCs (B. Pezo Nikolić, V. Velagić | Zagreb, Croatia)
- **13:00 Closing remarks**
- **Lunch**
